

Laminator **F 300L**, new type designed to apply reflective films on aluminium or steel profiles. We can also laminate colour vinyls on panels without painting the profile. We have gradually introduced some improvements, according to our customers needs and to the technical specifications from the producers of reflective films, providing all the basic controls for a good lamination.

Description

Laminating width: 200 mm
Laminating thickness from: 0 mm to 15 mm
Laminating speed from 0 to 10 meters / min
Up / down movement of the roll pneumatic
Fixation of the reflective sheet reel
Silicone rewinder Automatic
Apply pressure control 0 up to 6kg / cm²
Control of the reflective film pressure
Zig-zag reflective film guiding

Technical specifications

Length: 2800 m
Width: 660 mm
Height: 1400 mm
Pressure: 6 Bar
Weight: 500 Kg
Working temperature: +18° up to +26°
Regulation CE
We can adapt this laminators to your profiles
